

SLIL PUANGPOOM

SOFTWARE ENGINEER

99/89 Bangsue Bangkok 10800 | slil.puangpoom@gmail.com | 087-500-6783

Personal website : <https://blink-coding-blog.vercel.app>

Experienced full stack development with a strong focus on building scalable backend APIs using Golang and microservice architecture, alongside developing large modern web applications with Next.js, React, and monorepo strategies. Working across the entire software development lifecycle within agile development methodologies. Dedicated to writing clean, efficient, and maintainable code, and continuously exploring new technologies.

SKILLS

Next.js / React.js

Golang

PostgreSQL / MySQL

Node.js / Nest.js

JavaScript / TypeScript

Redis / RabbitMQ

PROFESSIONAL EXPERIENCE

Software Engineer | Dime! by Kiatnakin Phatra

Oct 2023 - Present

- Large-scale trading platform serving over half a million users.
- Primarily responsible for backend development, designing, implementing, and maintaining new features using Golang, with a focus on microservices architecture, Redis for caching, RabbitMQ for messaging, and PostgreSQL for database management to ensure high performance and scalability.
- Enhanced cross-platform experience by mobile application development using Flutter.

Senior Software Engineer | Ascend Group (Ascend Bit)

Jul 2022 - Oct 2023

- New business unit of the group exploring the Blockchain industry.
- Working on Web3 technologies and decentralized applications (DApps), including wallets, point systems, NFTs, and loyalty programs.
- My role focuses on implementing and consulting to team member on frontend development to interact with blockchain using Next.js. I also contributed to building a design system with Storybook to support large frontend projects.

Software Engineer | LSEG (London Stock Exchange Group)

Jul 2021 - Jun 2022

- Working with global international teams on a data platform project.
- Mainly role as frontend developer with React.js / Redux / Jest.
- Standard development process with Agile.

Software Engineer | Hatari wireless

Jul 2018 - Jun 2021

- As a software house, I worked on many type of projects ecommerce, banking, point wallet, chatbot.
- On technical side, starting project from scratch with designing the technical flow, database schema, and APIs. I worked on both the backend using C# .NET and the frontend using React.js.
- On the soft skills side, I led the team, managing tasks, ensuring smooth collaboration, and overseeing project delivery. worked closely with clients to understand their requirements, communicate technical concepts effectively, and ensure their needs were met.

EDUCATION

Bachelor of Engineering in Industrial Engineering

May 2013 - Jul 2017

Chulalongkorn University

GPA : 3.08
